NOTE: R—Denotes Regular Irrigation. F—Flood Irrigation.

Adequate Supply: Yes No Explain

Remarks

* This water is not fit for livestock consumption because of oil industry wastes which are dumped into these drainages upstream. Carol Proefrock does have stock but can not run them on this & other property because of this pollution. He requests the Water Conservation Board to investigate this problem, along with the following complaints

1- Because of increased activity of the oil industry regarding water injection Mr. Proefrock is concerned with a probable decrease in the water table

2- Alkali problems regarding his farming operation have increased drastically because of oil industry activity
