The figure is a map of a river basin. It shows a complex network of rivers and streams. A specific area, likely the study area, is highlighted in red. The map is labeled with 'River Basin' and 'Study Area'. The map shows the spatial distribution of the river network and the location of the study area within the basin.

|----------|------|---------|
| Operator | same | Address |
|----------|------|---------|

Water is delivered by:— 1. Private System; 2. Ditch Company; 3. State Project; 4. Federal Project; 5. Irrigation District

NOTE: R—Denotes Regular Irrigation. F—Flood Irrigation.

Adequate Supply: Yes No Explain.....
Remarks

1. **Basin** - A large area of land that drains water into a single body of water, such as a river or lake. The basin is defined by the topography of the land, with water flowing from the surrounding areas into the central water body.

2. **Watershed** - The area of land that drains water into a specific river or lake. It is the catchment area for the water body, and the water that flows into it from the surrounding land.

3. **Drainage** - The process of water flowing from the land into a body of water. It is the movement of water from the land to the water body, and it is the primary way in which water is removed from the land.

4. **Flow** - The movement of water from one place to another. It is the process of water moving from the land into the water body, and it is the primary way in which water is transported from the land to the water body.

5. **Channel** - A narrow body of water, such as a river or stream, that carries water from one place to another. It is the primary way in which water is transported from the land to the water body.

6. **Stream** - A small body of water, such as a river or stream, that carries water from one place to another. It is the primary way in which water is transported from the land to the water body.

7. **River** - A large body of water, such as a river or stream, that carries water from one place to another. It is the primary way in which water is transported from the land to the water body.

8. **Lake** - A large body of water, such as a river or stream, that carries water from one place to another. It is the primary way in which water is transported from the land to the water body.

9. **Ocean** - A large body of water, such as a river or stream, that carries water from one place to another. It is the primary way in which water is transported from the land to the water body.

10. **Sea** - A large body of water, such as a river or stream, that carries water from one place to another. It is the primary way in which water is transported from the land to the water body.
