Our abstract calls for all the water  
in north fork Coulie creek

April 12, 1949  
Barber Mont

Dear Sir

I have been trying to find out what I can about the water rights on this place, but I can't find out much.

I haven't found out where it was recorded at, but the man I fought it of, said he made and filed on a water right in about 1910 on all the water in north fork coulee creek and he used it until in the 30's.

We do not use that water at all but we use water coming out of Sec 1 and 2, and have used it the last 9 years, and will still continue to use it, I don't think there is a water right on it, we have ~~some~~ diversion dams on sec 1 and 2, on Wainwinkle creek that we hold up flood water. The land description are correct of our Peak Shroff Bros

Gentlemen:

In 1939 the State Legislature passed a law authorizing the State Engineer to investigate and compile a complete record of all water rights and water use in the State. In compliance with this law the State Engineer is now working in Golden Valley County compiling these data.

Enclosed herewith we are sending you two forms. The first one shows the ownership boundary of your land, with the irrigated and potential irrigable portions designated by color. We would like to have you check this map very carefully and make any corrections you may deem necessary.

As we do not have a record of a water filing covering this land, we are sending you Form WR-C, which we would like to have you complete and give us as much information as you can relative to the ditches and water rights covering the land.

Remember, this is your water and your water rights that we are trying to help you with.

Very truly yours,

Gerald J. Gravetz  
Assistant State Engineer
