Figure 1. Schematic representation of the experimental design. The figure is divided into two main sections: 'Pre-Test' and 'Main Experiment'. The 'Pre-Test' section includes 'Pre-Test 1' and 'Pre-Test 2'. The 'Main Experiment' section includes 'Main Experiment 1' and 'Main Experiment 2'. The 'Pre-Test' section is used to determine the optimal number of trials for each condition. The 'Main Experiment' section is used to test the effect of the number of trials on the performance of the subjects. The figure shows the sequence of events for each trial, including the presentation of the stimulus, the response, and the feedback. The figure also shows the number of trials for each condition and the number of subjects in each group.
