This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor creases and discoloration, particularly along the edges. A dark, possibly black, binding edge is visible on the left side of the page. The overall tone is warm and slightly off-white, characteristic of old paper.

1997 "The American Medical Association's (AMA) position on the use of the word 'disease' in the context of mental health is a clear example of the power of the medical profession to shape public policy. The AMA's position is that the word 'disease' should be reserved for physical conditions, and that mental health conditions should be referred to as 'disorders' or 'conditions'. This position is based on the AMA's belief that mental health conditions are not 'diseases' in the same sense as physical conditions, and that the use of the word 'disease' for mental health conditions is stigmatizing and dehumanizing. The AMA's position has been widely criticized, and many mental health advocates have called for a change in the AMA's position. However, the AMA's position remains in effect, and the use of the word 'disease' for mental health conditions continues to be a source of controversy and debate.
