Sec 21 T 98 R 6W

Indicate point of appropriation and place of use, if possible.

These springs are locally referred to as the "Barthelownew Springs".

Describe means of obtaining groundwater without a well "as by sub-irrigation and other natural processes". Include depth to water when applicable Water is usually obtained by gravity flow springs except for an occasional dry year when a centrifugal pump driven by a gasoline engine is used to lift the water from a depth of 1

Quantity of water developed and used with explanation of method used to measure or estimate such amount. If use is intermittent

estimate approximate lengths of periods of use 1,000 gallon capacity troughs are filled daily through the months of April, May, June, July, August, September, October and Extimated quantity of water withdrawn is November.

250,000 gallons per year
