County Recorder

December 6, 1972

Mr. Wesley L. Wagenaar Box 176 Lodge Grass, Montana 59050

Dear Mr. Wagenaar:

This is in response to your recent letter requesting instructions for filing on an undeveloped spring.

As stated in the form letter, which we sent you several weeksaago, a spring which is developed at its source of extrusion from the ground is considered a developed groundwater source and is therefore under the laws of Montana's 1961 Groundwater Code, which this Department administers. (A copy of the Groundwater Code is enclosed for your personal use.)

If a spring is not developed, it is condidered surface water. The State of Montana has no state administration of surface waters. The "administration" is basically up to each individual and the local district courts. The local district courts settle all disputes between surface water users when they arise. It is essential that in order to fulfill a surface water right that the water be diverted and put to some beneficial use.

Also enclosed is a pamphlet on Surface Water Rights, which would pertain to you in this particular case. We have underlined in red the areas, that specifically refer to filing surface water rights. There is no specific form, that has to be used for filing your surface water right. In many cases, a lawver draws up the appropriation for his client. Many years ago, a form was prepared for use in filing surface water rights: the form is titled Notice of Appropriation. We have enclosed two (2) copies of that form for your personal use. Additional copies can be purchased at most major office supply stores in Montana. When you have completed the form it should be recorded and filed in the local County Clerk & Recorder's Office. (A xerox copy of Montana laws pertaining to appropriating surface waters is also enclosed with important items underlined in red.)

If we can be of further assistance, please feel free to contact us at any time.

Sincerely,

Ronald J. Guse. GWRC WATER RESOURCES DIVISION

Doc. No. 236597

As the Administrator of the Groundwater Code for the State of Montana, please take note of the following special instructions, in order to properly protect your groundwater right.

Special Instructions:

Please provide, as indicated in red on the attached form, the dates the spring development was started and completed, and the means or method used to develop the spring.

NOTE: Undeveloped springs are usually considered surface water, and are therefore appropriated in an entirely different manner.

Thank you.

AGGITM HA DEPARTMENT GADMINISTRATOR OF GROUNDWATER CODE RESOURCES AND COME MONTANA WATER RESOURCES BOARD

NOTICE OF COMPLETION OF GROUNDWATER APPROPRIATION WITHOUT WELL

Developed After January 1, 1962

(Under Chapter 237, Montana Session Laws, 1961, as amended)

This form to be prepared by contractor (if any), otherwise by the owner.

Three copies of this notice are to be filed with the County Clerk and Recorder of the county in which the works are located.

Please answer all questions. If not applicable, so state, otherwise the form may be returned.
