SW 1/4 Sec. 5 T20 R. 51

Indicate point of appropriation and place of use, if possible. Each small square represents 10 acres.

2. The beneficial use on which the claim is based. Livestock
purposes since 1947

3. Date or approximate date of earliest beneficial use; and how continuous the use has been. 1947, continuous

4. The amount of groundwater claimed (in miner's inches or gallons per minute) 40 gallons per minute

5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof
None

6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal.
Wind mill, pump jack-gasoline engine

7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater. 1947

8. The depth of water table. 45'

9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater. 24" casing-1 1/2" pipe pump jack 54' deep

10. The estimated amount of groundwater withdrawn each ~~year~~ 10,368,000

11. The log of formations encountered in the drilling of each well if available. None

12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record. None

Describe means of obtaining groundwater without a well "as by
sub-irrigation and other natural processes". Include depth to
water when applicable.

Numerous springs and spring ponds along these
creeks are used by owner or operator as water
for livestock. Springs are cleaned and im-
proved from time to time to maintain consistent
flow.

Quantity of water developed and used with explanation of method
used to measure or estimate such amount. If use is intermittent

estimate approximate lengths of periods of use.

Use is constant. Springs and ponds are used
to water up to 100 head of cattle with an
estimated maximum consumption of 3000 gallons
daily.
