DECLARATION OF VESTED GROUNDWATER RIGHTS
(UNDER CHAPTER 237; MONTANA SESSION LAWS 1961)

John L. Hayenga
of Red Lodge

County of Wheatland, State of Montana, having appropriated groundwater according to the Montana Laws in effect prior to January 1, 1962, as follows:

1. The beneficial use on which the claim is based is household and livestock.

2. The date or approximate site of earliest beneficial use, and how continuous the use has been:

3. The amount of groundwater claimed (in inches or gallons per minute):

4. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner there of:

5. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal:

6. The date of commencement and the completion of the construction of the well, wells, or other works for withdrawal of groundwater:

7. Depth of water table:

8. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater:

9. The estimated amount of groundwater withdrawn each year:

10. The log of formations encountered in the drilling of each well if available:

11. Such other information of a similar nature as may be useful in carrying out the policy of this Act, including reference page of county records and book number:

County Clerk and Recorder
Notice of Completion of Groundwater Appropriation Without Well

(Under Chapter 237 Montana Session Laws, 1961)

Date of Appropriation of Groundwater: **June, 1955**

Owner: **BURTON T. RAW**
Address: **CARNEL, MONTANA**

Contractor (if any): **BURTON T. RAW**

Address of Contractor: **CARNEL, MONTANA**

Date Started: **June, 1955**
Date Completed: **June, 1955**

Describe means of obtaining groundwater without a well “as by sub-irrigation and other natural processes”. Include depth to water when applicable. **This is a spring developed by the owner that has a 3/4” casing going 8 1/4” into the ground; it has attached thereto 200’ of hose and runs a continuous 1” stream of water**

Quantity of water developed and used with explanation of method used to measure or estimate such amount. If use is intermittent estimate approximate lengths of periods of use: **Approximately 25 gallon per minute; used continuously for watering stock; water eventually seeps back into the ground; estimated amount through knowledge obtained by having other wells and knowing the flow therefrom**

Signature of Owner: **Burtor T. Raw**
Date: **May 2, 1962**

This form to be prepared by contractor (if any), otherwise by the owner.

Three copies of this notice are to be filed with the County Clerk and Recorder of the county in which the works are located.

Please answer all questions. If not applicable, so state, otherwise the form will be returned.

Original to the County Clerk and Recorder; duplicate to the State Engineer; triplicate to the Montana Bureau of Mines and Geology and quadruplicate for the Appropriator.

Notice of Completion of Groundwater Appropriation Without Well
(Under Chapter 237 Montana Session Laws, 1961)

Date of Appropriation of Groundwater: September 1924

Owner: Rachel V. Miscelin
Address: Roundup, Montana

Contractor (if any): None
Address of Contractor: None

Date Started: May 1932
Date Completed: August 1933

Describe means of obtaining groundwater without a well "as by sub-irrigation and other natural processes". Include depth to water when applicable. Natural Flowing Springs known in the area as Velvet Springs consisting of a group of springs, flow opened up somewhat by shallow excavating, consolidated by shallow trenches. Use of water is continuous for stock water. Total flow of water is fairly steady.

Quantity of water developed and used with explanation of method used to measure or estimate such amount. If use is intermittent estimate approximate lengths of periods of use for stock water continuous all year. In dry years water is used to irrigate 10 acre meadow. Total flow estimated at two cubic feet per second with the use of containers. Small diversion dam constructed of rock and earth ditch dug to convey water to meadow.

Describe means of obtaining groundwater without a well “as by sub-irrigation and other natural processes”. Include depth to water when applicable. Developed a spring in an old dry creek bottom by excavating approximately four feet. Built a 40-foot dam with rock and earth which served to form a reservoir from which a 20-acre meadow may be irrigated as required and to furnish stock water.

Quantity of water developed and used with explanation of method used to measure or estimate such amount. If use is intermittent, capacity of spring increased to 20 gallons per hour. Continuous use of stock water and seasonal use of water for irrigation
