Notice of Completion of Groundwater Appropriation Without Well

(Under Chapt. 237 Montana Session Laws, 1961)

Date of Appropriation of Groundwater: July 26, 1963

Owner: Address: 

Contractor (if any): 
Address of Contractor: 

Date Started: July 6; Date Completed: July 26, 1963

Describe means of obtaining groundwater without a well "as by sub-irrigation and other natural processes". Include depth to water when applicable.

- [ ] Sub-irrigation
- [ ] Other natural processes

Quantity of water developed and used with explanation of method used to measure or estimate such amount. If use is intermittent estimate approximate lengths of periods of use:

- 400 gal. per hour
- Water is used for livestock.

Indicate point of appropriation and place of use, if possible.

Signature of Owner: 
Date: December 23, 1963

This form to be prepared by contractor (if any), otherwise by the owner.

Three copies of this notice are to be filed with the County Clerk and Recorder of the county in which the works are located.

Please answer all questions. If not applicable, so state, otherwise the form will be returned.

Original to the County Clerk and Recorder; duplicate to the State Engineer; triplicate to the Montana Bureau of Mines and Geology and quadruplicate for the Appropriator.

have appropriated groundwater according to the Montana laws in effect prior to January 1, 1962, as follows:

2. The beneficial use on which the claim is based - Type, dug wells were developed to collect water for stock.

3. Date or approximate date of earliest beneficial use; and how continuous the use has been. This well has been used continuously for 10 years or more.

4. The amount of groundwater claimed (in miner's inches or gallons per minute). Approx 1 gallon per minute as long as the ditch with field up to the pipe is kept in mind.

5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof.

6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal. Wells equipped with water tables, pipes, and the pipe is kept at the end of the pipe in the water tank.

7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater. These were completed in 1960 at least 10 years before the particular date.

8. The depth of water table. This varies from the year to the dry year.

9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater. These were dug wells in a few feet deep.

10. The estimated amount of groundwater withdrawn each year. Usually, 500 gallons is about.

11. The log of formations encountered in the drilling of each well if available.

2. The beneficial use on which the claim is based upon construction and sinking of wells for use of water therefrom.

3. Date or approximate date of earliest beneficial use; and how continuous the use has been.  
The well in question is located near the farm existing in the Southwesterly corner of Lot 6, Sec. 8, T. 16 N., R. 21, Fergus County, Montana.  
The well is a dug well about 20 feet deep established in 1953.

4. The amount of groundwater claimed (in miner's inches or gallons per minute)  
150 miner's inches.

5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof.  
None of the water is used for irrigation but it is used for supplying water for livestock and is to be distinguished from a well within approximately 100 feet from in 1944, for which record has been made.

6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal by windlass and bucket, or electric pump.

7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater.  
The exact date in 1963 cannot be fixed closer than in the summer or fall of 1963.

8. The depth of water table has not been fully explored but approximately 6 or 6 feet.

9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater.  
The exact size of the well walls are about 6 or 7 feet by 7 or 8 feet and the well is about 20 feet deep.

10. The estimated amount of groundwater withdrawn each year is about 6,000 gallons.

11. The log of formations encountered in the drilling of each well if available.  
There was no log kept of the formations encountered but the well was sunk through an alluvial valley floor soil.

12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record.  
No county record has been made.
