APPROVED BY:

Oil and Gas Conservation Commission

Petroleum Engineer, Geologist, or Executive Secretary

Dated: ___, 1969
WELLS USED FOR FRESH WATER

When the well to be plugged may safely be used as a fresh water well, and such utilization is desired by the landowner, the well need not be filled above the required sealing plug set below fresh water; provided, that written notification of such utilization is secured from the landowner and filed with the Commission. Approval by the Petroleum Engineer of the work done shall relieve the operator of further responsibility.

County of FERGUS, State of MONTANA
have appropriated groundwater according to the Montana laws in effect prior to January 1, 1962, as follows:

2. The beneficial use on which the claim is based: 
   - Stock water and house use

3. Date or approximate date of earliest beneficial use and how continuous the use has been: 4 years ago on drilled well, and 6 years ago on dug well. Use has been continuous since.

4. The amount of groundwater claimed (in miner's inches or gallons per minute): 12 gallons per minute on drilled well, 1 gallon per minute on dug well.

5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof: 
   - No irrigation

6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal: Drilled well at house marked H in above plat, withdrawn by hand pump; dug well at X marked in above plat, withdrawn by motor and/or hand pump.

7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater: Drilled well at house, completed about four years ago; dug well about 300' East of house, completed about eight years ago.

8. The depth of water table: About 10' below surface

9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater: Drilled well 67' deep with 5' casing; dug well 18' deep.

10. The estimated amount of groundwater withdrawn each year: About 18,000 gallons from drilled well, and about 300,000 gallons from dug well.

11. The log of formations encountered in the drilling of each well if available: Sandy shale, then through 6' of sand to water (drilled well).

12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record:

Signature of Owner: TOM KJOLLEK
Date: NOVEMBER 18, 1963

Three copies to be filed by the owner with the County Clerk and Recorder of the county in which the well is located.

Please answer all questions. If not applicable, so state; otherwise the form will be returned.
