Describe means of obtaining groundwater without a well "as by sub-irrigation and other natural processes". Include depth to water when applicable. By sub-irrigation and other natural processes, e.g. by ditches leading from ten (10) acre-foot systems, distance to water from one (1) to three (3) foot. Sprinkler irrigation from ditches and railways.

Quantity of water developed and used with explanation of method used to measure or estimate such amount. If use is intermittent, estimate approximate lengths of periods of use. Four Hundred Fifty (450) gallons per minute used continuously—subirrigation and irrigation are land at twenty (20) acres, also used at all times for stock water and domestic use. 140 feet to water and other uses.
