ADMINISTRATOR OF GROUNDWATER CODE
OFFICE OF STATE ENGINEER

Declaration of Vested Groundwater Rights

JAN 16 1964

(Under Chapter 237, Montana Session Laws, 1961)

STATE ENGINEER

1. Frank J. Stockburger, of Toston,
(Name of Appropriator) (Address) (Town)
County of Gallatin, State of Montana
have appropriated groundwater according to the Montana laws in effect prior to January 1, 1962, as follows:

NW 1/4 of Section 22
SE 1/4 of Section 26
NW 1/4 of Section 27
Indicate point of appropriation and place of use, if possible. Each small square represents 10 acres.

2. The beneficial use on which the claim is based ~~stock watering & irrigation claimed on each of the springs designated in the three sections.~~

3. Date or approximate date of earliest beneficial use; and how continuous the use has been. Approximately 1910 to 1912 on each, use continuous.

4. The amount of groundwater claimed (in miner's inches or gallons per minute) See Addendum.

5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof See Addendum.

6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal See Addendum.

7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater Springs improved in 1910 to 1912. Periodically over the years. Fall of 1961 and 1962, each of them were improved by ASC project.

8. The depth of water table Ground level

9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater See addendum.

10. The estimated amount of groundwater withdrawn each year See addendum.

11. The log of formations encountered in the drilling of each well if available Not available.

12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record See addendum.

Signature of Owner Frank J. Stockburger
Date December 27, 1963.

Three copies to be filed by the owner with the County Clerk and Recorder of the county in which the well is located.

Please answer all questions. If not applicable, so state, otherwise the form will be returned.

Original to the County Clerk and Recorder; Duplicate to the State Engineer; Triplicate to the Montana Bureau of Mines and Geology, and Quadruplicate for the Appropriator.

ADDENDUM.

STATE ENGINEER

FRANK J. STOCKBURGER

In the declaration of vested groundwater rights, to which this addendum is attached, the appropriator has designated three improved springs situate and located on his lands in Sections 26, 27 and 22, Township 5 N. R. 3 East. Relevant required information as to these improved springs is as follows:

(1) This spring was first put to beneficial use at the time the property was homesteaded in approximately 1910. Over the years, various owners have increased the flow by pipes, digging, etc. The beneficial use is for stock watering and incidental irrigation in area immediately adjacent. In late 1961 and early 1962, the appropriator, in cooperation with the ASC Committee of Gallatin County, improved all three springs. On Spring No. 1, they dug out the spring, inserted 300 feet of $1\frac{1}{2}$ inch pipe to run the same to a stock watering trough. The water is also used to irrigate approximately two acres of pasture and garden area. Flow estimated as 36 miner's inches.

(2) This spring has likewise been used since homestead days, has been improved over the years and was improved in 1961 and 1962 by digging out the spring and running 300 feet of $1\frac{1}{2}$ inch pipe from the spring to a stock watering trough. Water was used for irrigation. Estimated flow of spring at 1 miner's inch.

(3) This spring was first improved and concreted in approximately 1912 and has been improved over the years by predecessors in interest of the appropriator and has been used for stock watering and irrigation since 1929 when he acquired the premises. In 1961 and 1962, the spring was redug and bulldozed and a reservoir of approximately 70 feet by 50 feet by 10 feet deep was erected around and over the spring. The reservoir also serves to catch high water running off the hills when the snow melts. Even without high water the spring fills the reservoir. Estimate the flow at $1\frac{1}{2}$ miner's inches. Irrigates pasture land immediately surrounding and in normal run off path.

No. 10. Appropriator has no means to accurately estimate the total amount of groundwater used from these three springs by virtue of the improvements. However, these three springs plus the two wells and the spring on Section 34 T. 5 N. R. 3 E., are sufficient to water 300 head of cattle and also to irrigate appropriator's lands. Appropriator estimates that each cow drinks 10 gallon of water per day, so beneficial use of stock watering alone is in excess of 900,000 gallons per year as claimed.

(Under Chapter 237, Montana Session Laws, 1961)

1. Frank J. Stockburger, of Poston,
(Name of Appropriator) (Address) (Town)
County of Gallatin State of Montana
have appropriated groundwater according to the Montana laws in effect prior to January 1, 1962, as follows:

SE 1/4 Sec. 34 T. 5 N. R. 3 E.
Indicate point of appropriation and place of use, if possible. Each small square represents 10 acres.

- 2. The beneficial use on which the claim is based (1) Well, domestic stockwatering, irrigation; (2) Spring, stock watering & irrigation; (3) Well, stock watering and/or irrigation.
Date of approximate date of earliest beneficial use; and how continuous the use has been (1)-1929, use continuous; (2) at least 1929, use continuous; (3) at least 1912, use intermittent.
- 4. The amount of groundwater claimed (in miner's inches or gallons per minute) (1) 20 gallons a minute; (2) 1 inch; (3) 1/2 inch.
- 5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof (1) irrigate lawn, garden; (2) irrigate at least an acre of garden and surrounding pastureland; (3) irrigate pasture land surrounding.
- 6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal (1) jet pump; (2) withdrawn by improvement to spring, pipe, troughs and reservoir; (3) pump.

- 7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater (1) See addendum.
- 8. The depth of water table exact depth of water table unknown.
- 9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater See addendum.
- 10. The estimated amount of groundwater withdrawn each year See Addendum.
- 11. The log of formations encountered in the drilling of each well if available not available.
- 12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record.

Signature of Owner Frank J. Stockburger
Date December 27, 1963.

Three copies to be filed by the owner with the County Clerk and Recorder of the county in which the well is located.
Please answer all questions. If not applicable, so state, otherwise the form will be returned.
Original to the County Clerk and Recorder; Duplicate to the State Engineer; Triplicate to the Montana Bureau of Mines and Geology, and Quadruplicate for the Appropriator.

33433

ADDENDUM.

FRANK J. STOCKBURGER

Well No. 1. This well was drilled prior to 1929. The well is approximately 45 feet deep, the water rising in the well to within ten feet of the surface. The well has a six inch casing and a jet pump is used to withdraw the water. The water is used for domestic use, for stock watering at calving time, and for irrigation of garden surrounding the yard. The well is at the house.

Well No. 2. This is a spring which has been beneficially used by the appropriator since 1929 and was used from time of homesteading for stock watering and irrigation of garden and pasture. In 1962, the appropriator, in cooperation with the A.S.C. Committee of Gallatin County, improved the spring by digging it out, inserting a pipe and cattle watering trough and by building a reservoir approximately 60 feet by 40 feet by 5 feet deep. This spring keeps the reservoir filled, the water not used for stock watering flowing by gravity to the garden in excess of an acre and surrounding pasture land.

Well No. 3. This is an old well which was first dug in approximately 1912 when this land was homesteaded. It is used intermittently and is dug on top of an old spring. Pump not used at present, but has been since homesteading days, water used primarily for stock watering.

No. 10. The estimated amount of groundwater withdrawn each year. It is impossible for the appropriator to determine the exact amount of ground water withdrawn by Well No. 1. Likewise, there are no measuring devices on Spring No. 2, or on the spring and old well No. 3. These three wells and springs, plus the developed springs in Sections 27, T. 5 N. R. 3 E., Section 22, T. 5 N.R. 3 E., and Section 26, T. 5 N.R. 3 E., furnish sufficient stock water for three hundred cows. Appropriator estimates that each cow drinks ten gallons of water a day to mean that something in excess of 900,000 gallons of groundwater are withdrawn each year for this purpose.

No. 11. No drilling logs are available for wells No. 1 and 3.

No. 12. It may be that the A.S.C. Committee of Gallatin County has filed statistical data prepared by them with the Clerk and Recorder of Gallatin County. Other than that, your appropriator knows of no county records which would be relevant here.

JAN 16 1964
STATE ENGINEER

I, FRANK J. STOCKBURGER, of Townsend
(Name of Appropriator) (Address) (Town)

County of Callatin State of Montana

have appropriated groundwater according to the Montana laws in effect prior to January 1, 1962, as follows:

NE 1/4 Sec. 2 T. 4N R. 3E
Indicate point of appropriation and place of use, if possible. Each small square represents 10 acres.

2. The beneficial use on which the claim is based drinking and irrigation, for stock

3. Date or approximate date of earliest beneficial use; and how continuous the use has been 1920 for school purposes and stock

4. The amount of groundwater claimed (in miner's inches or gallons per minute) 100 gallons per minute

5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof one acre 217.5' x 200'

6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal Hand pump

7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater 1920

8. The depth of water table 30 feet

9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater six (6) inch casing—45 feet deep

10. The estimated amount of groundwater withdrawn each year 300,000 gallons

11. The log of formations encountered in the drilling of each well if available not available

12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record not applicable

Signature of ^{Joint} Owner Frank J. Stockburger
Date 12/30/63

Three copies to be filed by the owner with the County Clerk and Recorder of the county in which the well is located.

Please answer all questions. If not applicable, so state, otherwise the form will be returned.
