2. Sec. 27, W 2, N 3, E 3
3. Sec. 26, W 2, N 3, E 3

2. The beneficial use on which the claim is based: stock watering
3. Date or approximate date of earliest beneficial use: January 1, 1910
4. The amount of groundwater claimed (in miner's inches or gallons per minute): 20
5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof
6. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater
7. The depth of water table
8. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal
9. As far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater
10. The estimated amount of groundwater withdrawn each year
11. The log of formations encountered in the drilling of each well if available
12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record

Signature of Owner: Frank J. Stockburger
Date: December 27, 1963

Three copies to be filed by the owner with the County Clerk and Recorder of the county in which the well is located. These answer all questions. If not applicable, so state, otherwise the form will be returned.

Original to the County Clerk and Recorder; Duplicate to the State Engineer; Triplicate to the Montana Bureau of Mines and Geology, and Quadruplicate for the Appropriate.
In the declaration of vested groundwater rights, to which this addendum is attached, the appropriator has designated three improved springs situate and located on his lands in Sections 26, 27 and 22, Township 5 N., Range 13 E. Relevant required information as to these improved springs is as follows:

1. This spring was first put to beneficial use at the time the property was homesteaded in approximately 1910. Over the years, various owners have increased the flow by pipes, digging, etc. The beneficial use is for stock watering and incidental irrigation in an immediate adjacent. In late 1961 and early 1962, the appropriator, in cooperation with the ASC Committee of Gallatin County, improved all three springs. On Spring No. 1, they dug out the spring, inserted 100 feet of 1½ inch pipe from the spring to a stock watering trough. The water is also used to irrigate approximately two acres of pasture and garden area. Flow estimated as 36 miner's inches.

2. This spring has likewise been used since homestead days, has been improved over the years by digging out the spring and running 300 feet of 1½ inch pipe from the spring to a stock watering trough. Water was used for irrigation. Estimated flow of spring at 1 miner's inch.

3. This spring was first improved and concreted in approximately 1912 and has been improved over the years by predecessors in interest of the appropriator and has been used for stock watering and irrigation since 1929 when he acquired the premises. In 1951 and 1962, the spring was redug and bulldozed and a reservoir of approximately 70 feet by 50 feet by 10 feet deep was erected around and over the spring. The reservoir also serves to catch high water running off the hills when the snow melts. Even without high water the spring fills the reservoir. Estimated flow at 1½ miner's inches. Irrigates pasture land immediately surrounding and in normal run off path.

No. 10. Appropriator has no means to accurately estimate the total amount of groundwater used from these three springs by virtue of the improvements. However, these three springs plus the two wells and the spring on Section 34, T. 5 N., Range 13 E., are sufficient to water 300 head of cattle and also to irrigate appropriator's lands. Appropriator estimates that each cow drinks 10 gallon of water per day, to beneficial use of stock watering alone is in excess of 900,000 gallons per year as claimed.
Notice of Completion of Groundwater Appropriation by Means of Well
DEVELOPED AFTER JANUARY 1, 1962

(Under Chapter 237 Montana Session Laws, 1961, as amended)

Owner: GARY WELCH  Address: TOWNSEND, MONTANA

Driller: VAN DYK DRILLING CO  Address: BOXNAM, MONT.

Date of Notice of appropriation of groundwater: none

Date well started: July 6/70  Date completed: July 10/70

Type of well: Drilled  Equipment used: Rotary
(Dug, driven, bored or drilled) (Cham drill, rotary or other)

Water use: Domestic  Municipal  Stock  Irrigation  Industrial  Drainage  Other

Indicate on the diagram the character and thickness of the different strata met with in drilling, such as soil, clay, shale, gravel, rock or sand, etc. Show depth at which water is encountered, thickness and character of water-bearing strata and height to which the water rises in the well.

Declaration of Vested Groundwater Rights
(Under Chapter 237, Montana Session Laws, 1961)

1. Frank J. Stockburger, of Toston, Montana,
   County of Gallatin, State of Montana,
   have appropriated groundwater according to the Montana laws in effect prior to January 1, 1962, as follows:

   2. The beneficial use on which the claim is based: (1) Well, domestic stock watering, irrigation; (2) Spring, stock watering & irrigation; (3) Well, stock watering and/or domestic use. Approximate date of earliest beneficial use: and how continuous the use has been: (1) 1929, use continuous; (2) at least 1932, use continuous; (3) at least 1912, use intermittent.

   3. The amount of groundwater claimed (in miner's inches or gallons per minute): (1) 20 gallons a minute; (2) 1 inch; (3) 1/2 inch.

   4. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof.

   5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof.

   6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal: (1) jet pump; (2) withdraw by improvement to spring, pipe, troughs and reservoir; (3) pump.

   7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater: See addendum.

   8. The depth of water table: exact depth of water table unknown.

   9. So far as it may be available, the type, size, and depth of each well or the general specifications of any other works for the withdrawal of groundwater: See addendum.

   10. The estimated amount of groundwater withdrawn each year: See Addendum.

   11. The log of formations encountered in the drilling of each well if available: not available.

   12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record.

   Signature of Owner: 
   Date: December 27, 1963.

Three copies to be filed by the owner with the County Clerk and Recorder of the county in which the well is located.

Please answer all questions. If not applicable, so state, otherwise the form will be returned.

Original to the County Clerk and Recorder; Duplicate to the State Engineer; Triplicate to the Montana Bureau of Mines and Geology, and Quadruplicate for the Appropiator.
Stevens County / Montana

Filed: 1/20/1953

Earl Staley
County Clerk & Recorder

Fe: 8Z
Well No. 1. This well was drilled prior to 1929. The well is approximately 45 feet deep, the water rising in the well to within ten feet of the surface. The well has a six-inch casing and a jet pump is used to withdraw the water. The water is used for domestic use, for stock watering at calving time, and for irrigation of garden surrounding the yard. The well is at the house.

Well No. 2. This is a spring which has been beneficially used by the appropriator since 1929 and was used from time of homesteading for stock watering and irrigation of garden and pasture. In 1962, the appropriator, in cooperation with the A.S.C. Committee of Gallatin County, improved the spring by digging it out, inserting a pipe and cattle watering trough and by building a reservoir approximately 60 feet by 40 feet by 5 feet deep. This spring keeps the reservoir filled, the water not used for stock watering flowing by gravity to the garden in excess of an acre and surrounding pasture land.

Well No. 3. This is an old well which was first dug in approximately 1912 when this land was homesteaded. It is used intermittently and is dug on top of an old spring. Pump not used at present, but has been since homesteading days, water used primarily for stock watering.

No. 10. The estimated amount of groundwater withdrawn each year. It is impossible for the appropriator to determine the exact amount of ground water withdrawn by Well No. 1. Likewise, there are no measuring devices on Spring No. 2, or on the spring and old well No. 3. The developed springs in Sections 27, T. 5 N., R. 3 E., Section 22, T. 5 N., R. 3 E., and Section 26, T. 5 N., R. 3 E., furnish sufficient stock water for three hundred cows. Appropriator estimates that each cow drinks ten gallons of water a day to mean that something in excess of 900,000 gallons of groundwater are withdrawn each year for this purpose.

No. 11. No drilling logs are available for wells No. 1 and 3.

No. 12. It may be that the A.S.C. Committee of Gallatin County has filed statistical data prepared by them with the Clerk and Recorder of Gallatin County. Other than that, your appropriator knows of no county records which would be relevant here.

Declaration of Vested Groundwater Rights
(Under Chapter 237, Montana Session Laws, 1961)

FRANK J. STOCKMANN
(Name of Appropriator) of Gallatin State of Montana
have appropriated groundwater according to the Montana laws in effect prior to January 1, 1962, as follows:

1. Declaration of Vested Groundwater Rights
2. The beneficial use on which the claim is based drinking and irrigation, for stock

3. Date or approximate date of earliest beneficial use; and how continuous the use has been 1920 for school purposes and stock

4. The amount of groundwater claimed (in miner's inches or gallons per minute) 100 gallons per minute

5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof acre 217.6' x 200'

6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal: Hand pump

7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater 1920

8. The depth of water table 30 feet

9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater: six (6) inch casing 45 feet deep

10. The estimated amount of groundwater withdrawn each year 300,000 gallons

11. The log of formations encountered in the drilling of each well if available not available

12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record not applicable

Signature of Owner
Date 12/30/63

Three copies to be filed by the owner with the County Clerk and Recorder of the county in which the well is located.

Please answer all questions. If not applicable, so state, otherwise the form will be returned.

Original to the County Clerk and Recorder; Duplicate to the State Engineer; Triplicate to the Montana Bureau of Mines and Geology, and Quadruplicate for the Appropriator.
Notice of Completion of Groundwater Appropriation Without Well

(Under Chapter 237, Montana Session Laws, 1961)

Date of Appropriation of Groundwater: May 1944

Owner: Henry Brinck
Address: Manhattan, Montana

Contractor (if any):
Address of Contractor:

Date Started: May 1944; Date Completed: May 1944

Describe means of obtaining groundwater without a well "as by sub-irrigation and other natural processes". Include depth to water when applicable.

Quantity of water developed and used with explanation of method used to measure or estimate such amount. If use is intermittent, estimate approximate lengths of periods of use.

Indicate point of appropriation and place of use, if possible.

Signature of Owner: Henry Brinck
Date: Dec 30, 1963

This form to be prepared by contractor (if any), otherwise by the owner.

Three copies of this notice are to be filed with the County Clerk and Recorder of the county in which the works are located.

Please answer all questions. If not applicable, so state, otherwise the form will be returned.

Original to the County Clerk and Recorder; duplicate to the State Engineer; triplicate to the Montana Bureau of Mines and Geology and quadruplicate for the Appropriator.
Notice of Completion of Groundwater Appropriation Without Well

(Under Chapter 237 Montana Session Laws, 1961)

Date of Appropriation of Groundwater 1947-1953 as per plat

Owner: Harry Braid, Manhattan, Montana

Contractor (if any): None

Address of Contractor: 1947

Date Started: 1953 Date Completed: 1958

Describe means of obtaining groundwater without a well "as by sub-irrigation and other natural processes". Include depth to water when applicable:

- Enlarged and improved springs, 1947 spring flows into earth dam. 1953 spring flows into large water tank.

Quantity of water developed and used with explanation of method used to measure or estimate such amount. If use is intermittent, estimate approximate lengths of periods of use:

- Both springs flow year around and are used constantly. Total flow from both springs 45 gallons per minute.

Signature of Owner: Harry Braid June 30, 1963

This form to be prepared by contractor (if any), otherwise by the owner.

Three copies of this notice are to be filed with the County Clerk and Recorder of the county in which the works are located.

Please answer all questions. If not applicable, so state, otherwise the form will be returned.

Original to the County Clerk and Recorder; duplicate to the State Engineer; triplicate to the Montana Bureau of Mines and Geology; and quadruplicate for the Appropriator.
