2. The beneficial use on which the claim is based: Household, Stock and Poultry.

3. Date or approximate date of earliest beneficial use; and how continuous the use has been: 1945, Continuous.

4. The amount of groundwater claimed (in miner's inches or gallons per minute): two gallon per minute.

5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof: not used.

6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal: well with pump.

7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater: July 1945.

8. The depth of water table: 50 feet.

9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater: drilled well 60 feet deep.

10. The estimated amount of groundwater withdrawn each year: 5000 gallon.

11. The log of formations encountered in the drilling of each well if available: not available.

12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record.

Describe means of obtaining groundwater without a well "as by sub-irrigation and other natural processes". Indicate depth to water when applicable. Series of large springs over an area of approximately 5 acres. Rock and concrete reservoirs with inch and half to 1/4 inch galvanized pipes to residences and gardens. Due to 1 ft. evaporation at pipe intakes. Source of water apparently from "June Creek" a subterranean stream in Mission Range. Immediately below reservoir made water runs in surface channels and is diverted for irrigation purposes on approximately 2 acres of pasture. Water flows from East to West. Quantity of water developed and used with explanation of method used to measure or estimate such amount. If use is intermittent, estimate approximate lengths of periods of use. Water through two pipelines used continuously for domestic purposes. Irrigation water used intermittently for irrigation during growing season and stock water during winter months continuously. Estimated average flow 12 inches continuous flow and amount arrived at by numerous computations with 1400 gals. of water furnished for irrigation by United States Indian Reclamation Service on other section of ranch.
