I have appropriated groundwater according to the Montana laws in effect prior to January 1, 1962, as follows:

2. The beneficial use on which the claim is based: Domestic household use.

3. Date or approximate date of earliest beneficial use; and how continuous the use has been: 1955-

4. The amount of groundwater claimed (in miner's inches or gallons per minute): 3 gals. per minute.

5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof: No irrigation.

6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal: Electric Pumps, Storage Tanks.

7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater: 1952.

8. The depth of water table: 140 ft.

9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater: 6" TD pipe - depth 140 ft.

10. The estimated amount of groundwater withdrawn each year: Capacity of well.

11. The log of formations encountered in the drilling of each well if available: Not available.

12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record: None.

Signature of Owner: WALTER M. JOHNSON
Date: Dec 11 1963

DECLARATION OF VESTED GROUNDWATER RIGHTS
(Under Chapter 237, Montana Session Laws, 1961)

1. VELMA R. GREEN, of Marshall Canyon, Missoula, have appropriated groundwater according to the Montana laws in effect prior to January 1, 1962, as follows:

2. The beneficial use on which the claim is based is for domestic use and for the use of the appropriator's ski lodge business known as the Marshall Ski Area.

3. Date or approximate date of earliest beneficial use; and how continuous the use has been. Approximately 1900 and continuously thereafter up to the present time.

4. The amount of groundwater claimed (in miner's inches or gallons per minute). Approximately 8 gallons per minute.

5. If used for irrigation, give the acreage and description of the lands to which water has been applied and names of the owner thereof. The only use for irrigation is occasionally in the yard in and around the house, although in former years the owners of the Marshall Ski Area have used the same for irrigating hay and pasture.

6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal. The water is withdrawn from the ground by means of a pipe located at the source of the spring for which this appropriation is made. The spring is 200 feet south of the Marshall Ski Lodge.

7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater. The spring has been in use since approximately the year 1900.

8. The depth of water table. 2 - 4 feet.

9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater. No wells are used for this purpose.

10. The estimated amount of groundwater withdrawn each year. At a continuous flow averaging 8 gallons per minute.

11. The log of formations encountered in the drilling of each well if available. No log of formations encountered.

12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record. No county records of this appropriation have been discovered.

Signature of Owner

Date: December 30, 1963

Three copies to be filed by the owner with the County Clerk and Recorder of the county in which the well is located.

Please answer all questions. If not applicable, so state, otherwise the form will be returned.

5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof: The only use for irrigation is occasionally in the yard in and around the house, although in former years the owners of the Marshall Ski Area have used the same for irrigating hay and pasture.

6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal: This application is filed for the use of a slume running in an easterly and westerly direction across the premises of Section 5, Township 13 North, Range 18 West, M.P.M.

7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater: Since the year 1944 and intermittently thereafter.

8. The depth of water table: On the surface.

9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater: No wells are used for this purpose.

10. The estimated amount of groundwater withdrawn each year: An intermittent flow capable of averaging 60 gallons per minute.

11. The log of formations encountered in the drilling of each well if available: No log of formations encountered.

12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record: No county records of this appropriation have been discovered.

BUSINESS KNOWN AS THE MARSHALL SKI AREA.

3. Date or approximate date of earliest beneficial use; and how continuous the use has been. Approximately 1950 and continuously thereafter up to the present time.

4. The amount of groundwater claimed (in miner's inches or gallons per minute). Approximately 15 gallons per minute.

5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof. The only use for irrigation is occasionally in the yard in and around the house, although in former years the owners of the Marshall Ski Area have used the same for irrigating hay and pasture.

6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal. The water is withdrawn from the ground by means of a pipe located at the source of the spring for which this appropriation is made. The spring is 500 feet south of the parking lot of the Marshall Ski Area.

7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater. The spring has been in use since approximately the year 1950.

8. The depth of water table. 2.4 feet.

9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater. No wells are used for this purpose.

10. The estimated amount of groundwater withdrawn each year. At a continuous flow averaging 15 gallons per minute.

Describe means of obtaining groundwater without a well "as by sub-irrigation and other natural processes". Include depth to water when applicable.

Six natural springs that flow throughout the year.

Quantity of water developed and used with explanation of method used to measure or estimate such amount. If use is intermittent, estimate approximate lengths of periods of use.

Water is unknown since it is not measured. Its use is continuous for irrigation and stock water.
