and	licate point of appropriation l place of use, if possible. Each all square represents 10 acres. 6. The means of withdrawing such water from the ground and the loca-
	tion of each well or other means of withdrawal. A - Boxed appring with gravity flow and siped a
	quarter of mile to house located in Section 13
7.	B - Undeveloped Spring The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater. A - Boxed and piped to house in 1915; B - Undeveloped
8.	The depth of water table A - Surface Water Spring: B - Surface water spring
9.	So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater.
	A - Spring has concrete how of 5 ft. dismeter and about six feet deep with one inch pipe at box reduced to 1/2 inch near house
	R - Undervoloped
	The estimated amount of groundwater withdrawn each year A = 246,000 gallons per year; B - 300,000 gallons per year
11.	The log of formations encountered in the drilling of each well if available
12.	Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record.

Three copies to be filed by the owner with the County Clerk and Recorder of the county in which the well is located.

Signature of Owner 21 alter Hakey

Date December 30, 1963

Please answer all questions. If not applicable, so state, otherwise the form will be returned.

Original to the County Clerk and Recorder; Duplicate to the State Engineer; Triplicate to the Montana Bureau of Mines and Geology, and Quadruplicate for the Approprietor.
