(Under Chapter 237, Montana Session Laws, 1961)

1. Harry Swanson, of Valier, have appropriated groundwater according to the Montana laws in effect prior to January 1, 1962, as follows:

2. The beneficial use on which the claim is based: household and livestock use.

3. Date or approximate date of earliest beneficial use; and how continuous the use has been: 1915 has been used continuously ever since.

4. The amount of groundwater claimed (in miner’s inches or gallons per minute): 20 gallons per minute.

5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof: Not Applicable.

6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal: by electric pump. Well is located as shown above.

7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater: 1915.

8. The depth of water table: 100 feet below surface.

9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater: depth - 125 feet. Steel casing 5 inches in diameter.

10. The estimated amount of groundwater withdrawn each year: One Hundred Thousand Gallons.

11. The log of formations encountered in the drilling of each well if available: Not Available.

12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record: No other information available.

As the Administrator of the Groundwater Code for the State of Montana, please take note of the following special instructions, in order to properly protect your groundwater right.

Special Instructions:

Please provide, as indicated in red on the enclosed form, the pumping water level, and gallons per minute claimed.

Thank you.

When we drilled this well, we put in a new submersible pump, and let it run for 36 hrs. at 10 - 15 gal per minute. We didn't check the water level at that time, so I have no way of telling what the water level (over)
was dug. I do know, at that rate, it won't pump dry. The well is 180', deep & the water level is 115' - 120'.

We use it for the house (samples to state says it is good for horses & human consumption), sprinkling garden & lawn, also for a few head of cattle. As far as GPM I don't know how far it would go. Thanks.

P.S. Please correct the spelling of the name. It is DERKS
