have appropriated groundwater according to the Montana laws in effect prior to January 1, 1962, as follows:

2. The beneficial use on which the claim is based: Watering cattle.

3. Date or approximate date of earliest beneficial use; and how continuous the use has been since: 1954. Continuous use.

4. The amount of groundwater claimed (in miner's inches or gallons per minute): 5 GPM.

5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof: Not so used.

6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal: Well, cylinder pump, electric, gas plate.

7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater: 1954. Exact dates of commencement and completion: unknown.

8. The depth of water table: 50 feet.

9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater: 150 feet, drilled, three inches, steel casing.

10. The estimated amount of groundwater withdrawn each year: 160,000 gallons.

11. The log of formations encountered in the drilling of each well if available: None available.

12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record: None.

I did not ask for a log of the well and my driller Andy Nooto has deceased. But every time I talk with him when he was drilling, He was in clay all the way down except some coal 1 to 4 ft. After 200 ft he went through a rock about 5 ft then clay again. The first water he hit around 190 ft. He went down 200 ft and tried it. But was not enough water. So put in a casing 201 ft of 6 in. Then went down 75 ft and put 1½ in casing.

Then he told me if I don't pump it to fast I would have enough water for my stock of witch I have.
