Length of test about 10 hours, unable to lower it.

Remarks: (Gravel packing, cementing, packers, type of shut-off, depth of shut-off)

A wonderful well, watered 250 head of cattle & horses at this well in winter of 1924-25. Impossible to pump it dry. One time we left the place 3 days & nights, forgot to turn the windmill off when we left, with a heavy wind blowing all this time. When we returned, it was pumping a full stream of water, and our fields below the well were all under water. Miller told me he had struck the main vein leading to a good spring one mile south. Soft water & ice cold. Last 20 feet was rock and when they got thru the rock the water came. A wonderful well, I think there is none better in our community.
