Describe means of obtaining groundwater without a well "as by sub-irrigation and other natural processes". Include depth to water when applicable. All springs are natural sub-irrigation. Surface flow from underground water supply. Water ponds in this 1/2 acre area of 20 acres covering all springs. 60 acres adjoining these springs is sub-irrigated from the water supply.

Quantity of water developed and used with explanation of method used to measure or estimate such amount. If use is intermittent, estimate approximate length of periods of use. Estimate amount of water used is impossible because of the sub-irrigation for plant growth rather than stock water.
