Declaration of Vested Groundwater Rights
(Under Chapter 237, Montana Session Laws, 1961)

County of Teton, State of Montana

have appropriated groundwater according to the Montana laws in effect prior to January 1, 1962, as follows:

2. The beneficial use on which the claim is based, livestock, household use.

3. Date or approximate date of earliest beneficial use; and how continuous the use has been. Weil 41 - 1957 to 1968, use continuous.

4. The amount of groundwater claimed (in miner's inches or gallons per minute). 10 gals. per minute.

5. If used for irrigation, give the average and description of the land to which water has been applied and name of the owner thereof. None.

6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal. Electric pump, hand pump.

7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater. Well 41 completed 1957, Well 42 completed 1938.

8. The depth of water table. Well 41, 40'; Well 42, 50'.

9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater. 6" pipes, depths of 40', 50'.

10. The estimated amount of groundwater withdrawn each year. 250,000 gals. per year.

11. The log of formations encountered in the drilling of each well if available. Unknown.

12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record. None.

Date Started: April 1933; Date Completed: Immediately and 1943

Describe means of obtaining groundwater without a well "as by sub-irrigation and other natural processes". Include depth to water when applicable. Depth is unknown as these are natural Springs, but appears to be shallow. Water-holes dug and cleaned out for watering stock and 8 reservoirs constructed. Position of Springs and reservoirs shown on plat attached.

At present some of the Springs are dry, due to drought conditions.

No irrigation.

Quantity of water developed and used with explanation of method used to measure or estimate such amount. If use is intermittent estimate approximate lengths of periods of use.

Water used continuously for livestock and domestic purposes, approximately 35-Miners inches. Water from the Springs and reservoirs, in addition to that from wells (shown on Form GW 4), sufficient for household use and to water 200-head of cattle the year around.

2. The beneficial use on which the claim is based

   domestic and limited irrigation

3. Date or approximate date of earliest beneficial use; and how continuous the use has been

   continuous use since 1914

4. The amount of groundwater claimed (in miner's inches or gallons per minute) — 20 gallons per minute

5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof

   lawn and garden adjacent to well

6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal

   pump

7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater — 1914

8. The depth of water table — 10 feet

9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater

   dug well, diameter 6 feet, depth 12 feet

10. The estimate amount of groundwater withdrawn each year — quarter million gallons

11. The log of formations encountered in the drilling of each well if available

   not available

12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record

   none
