Notice of Completion of Groundwater Appropriation Without Well

(Under Chapter 237 Montana Session Laws, 1961)

Date of Appropriation of Groundwater: July 1, 1939
Owner: Clint Stillman Address: Choteau, Montana
Contractor (if any): None
Address of Contractor: None
Date Started: Unknown Date Completed: Unknown

Describe means of obtaining groundwater without a well "as by sub-irrigation and other natural processes". Include depth to water when applicable. There are four natural springs located across the south-half of the Southeast Quarter of Section 14, Twp. 24N., Rge. 5W.

They have never been developed and flow into a small stream and eventually run into Teton River.

Quantity of water developed and used with explanation of method used to measure or estimate such amount. If use is intermittent estimate approximate lengths of periods of use. Water from these springs is used for stock water and to irrigate grass in the area. These springs flow at 5 gallons per minute during a year. We use 2,000,000 gallons of water from said springs for irrigation and stock water.

Describe means of obtaining groundwater without a well "as by
sub-irrigation and other natural processes". Include depth to
water when applicable. Water rose to surface of ground after
digging 3 pits to the depth of 10 to 12 ft. These pits
will be connected with a ditch and extended on for
irrigation purposes.

used to measure or estimate such amount. If use is intermittent,
estimate approximate lengths of periods of use. We expect to develop
approx. 13,200 gpm per min of water based on one pit
producing 210 gal per min (water rose 1" in 1 min in hole
