STATE OF MONTANA ADMINISTRATOR OF GROUNDWATER CODE OFFICE OF STATE ENGINEER

[D] JAN 16 1964

Declaration of Vested Groundwater Rights

(Under Chapter 237, Montana Session Laws, 1961)

County of Valley State of Montana have appropriated groundwater according to the Montana laws in effect prior to January 1, 1962, as follows: 2. The beneficial use on which the claim is based. 11vestock water. 3. Date or approximate date of earliest beneficial use; and how conting out the use has been 1915. 4. The amount of groundwater claimed (in miner's inches or galled per minute) 2.6. gallons. per minute 5. If used for irrigation, give the acreage and description of the law to which water has been applied and name of the owner there was been applied and name of the owner there is no continued and place of use, if possible. Each mail square represents 10 acres. 6. The means of withdrawing such water from the ground and the lost ion of each well or other means of withdrawing. 5. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater. 6. The means of withdrawing such water from the ground and the lost ion of each well or other means of withdrawing. 5. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater. 6. The means of withdrawing such water from the ground and the lost ion of each well or other means of withdrawing. 5. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater. 6. The means of withdrawing such water from the ground and the lost ion of each well or other means of withdrawing such water from the groundwater withdrawing such water from the groundwater withdrawing such water from the groundwater acceptance of which water has been applied and name of the owner there. 6. The means of withdrawing such water from the groundwater withdrawing such water from the ground		T C BY MON O	, of 40 2nd Avenue No. Glasgow
2. The beneficial use on which the claim is based. 11	(Name	e of Appropriator)	(Address) (10wn)
2. The beneficial use on which the claim is based. 1ivestock watex 3. Date or approximate date of earliest beneficial use; and how conting out the use has been 1915 4. The amount of groundwater claimed (in miner's mehes or gallonger minute) 2,6. gallons.per.minute 5. If used for irrigation, give the acreage and description of the law to which water has been applied and name of the owner there while water has been applied and name of the owner there while water represents 10 acres. 6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal. Surface ponds or reservoire fed by natural. springs. 7. The date of commencement and completion of the construction of the well, wells, or other works for with drawal of groundwater. 8. The depth of water table. 9. So far as it may be available, the type, size and depth of each well or the general specifications of any out works for the withdrawal of groundwater withdrawn each year. 584,000 gallons. 10. The estimated amount of groundwater withdrawn each year. 584,000 gallons.	County of V	alley	State of Picitalia
19 3. Date or approximate date of earliest beneficial use; and how conting out the use has been 1915. 4. The amount of groundwater claimed (in miner's inches or gallow per minute) 2.6. gallons.per.minute 5. If used for irrigation, give the acreage and description of the land to which water has been applied and name of the owner there which water has been applied and name of the owner there is square represents 10 acres. 6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal square represents 10 acres. 7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater. 8. The depth of water table. 9. So far as it may be available, the type, size and depth of each well or the general specifications of any off works for the withdrawal of groundwater withdrawn each year. 584,000 gallons. 19. The log of formations encountered in the drilling of each well if available. 10. The estimated amount of groundwater withdrawn each year. 584,000 gallons.	have appropriated g	roundwater according t	o the Montana laws in effect prior to January 1, 1902, as lollows:
3. Date or approximate date of earliest beneficial use; and how conting our the use has been 1915. 4. The amount of groundwater claimed (in miner's inches or gallons per minute). 2,6. gallons.per minute. 5. If used for irrigation, give the acreage and description of the land to which water has been applied and name of the owner there. 5. If used for irrigation, give the acreage and description of the land place of use, if possible. Each mall square represents 10 acres. 6. The means of withdrawing such water from the ground and the lost tion of each well or other means of withdrawal surface ponds. or keasyvoirs fed by natural springs. 7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater. 8. The depth of water table. 9. So far as it may be available, the type, size and depth of each well or the general specifications of any off works for the withdrawal of groundwater. 10. The cestimated amount of groundwater withdrawn each year. 584,000 gallons. 11. The log of formations encountered in the drilling of each well if svailable. 12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record.	N		
So Date or approximate date of certicest beneficial use; and now conting our the use has been 1915 4. The amount of groundwater claimed (in miner's inches or gallo per minute) 2.6. gallons.per minute 5. If used for irrigation, give the acreage and description of the land to which water has been applied and name of the owner there to which water has been applied and name of the owner there is surface points of appropriation and place of tes, if possible Each mall square represents 10 acres. 6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal. Surface ponds.or.reservoirs fed by natural springs. 7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater. 8. The depth of water table. 9. So far as it may be available, the type, size and depth of each well or the general specifications of any oth works for the withdrawal of groundwater. 10.
