Declaration of Vested Groundwater Rights [ (Under Chapter 237, Montana Session Laws, 1961)  1. About Jampopriator), of Jantara (Address)  County of Appropriator to the Montana laws in effect prior to January 1, have appropriated groundwater according to the Montana laws in effect prior to January 1, and the use has been applied and name of the will water has been applied and name of the will square represents 10 acres.  1. The amount of groundwater laws to which water has been applied and name of the will square represents 10 acres.  2. The beneficial use on which the claim is based of the use has been applied and name of the will water has been applied and name of the will square represents 10 acres.  3. Date or approximate date of earliest beneficial use on which water has been applied and name of the will water has been applied and name of the will square represents 10 acres.  4. The amount of groundwater laws to which water has been applied and name of the will square represents 10 acres.  5. If used for irrigation, give the acreage and desert owhich water has been applied and name of the will square represents 10 acres.  6. The means of withdrawing such water from the groundwater and completion of the construction of the well, wells, or other means of withdrawal.  6. The depth of water table at the acres of the well or the general specific works for the withdrawal of groundwater.  8. The depth of water table at the property of the works for the withdrawal of groundwater.  8. The depth of water table at the property of the works for the withdrawal of groundwater.	
Declaration of Vested Groundwater Rights (Under Chapter 237, Montana Session Laws, 1961)  1. Cloudy of Appropriator)  County of Alley State of Montana laws in effect prior to January 1, N  2. The beneficial use on which the claim is based of the well water has been 1975 and 1984.  3. Date or approximate date of earliest beneficial use on which the claim is based of the water has been 1975 and 1984.  4. The amount of groundwater claimed (in miner per minute) about T gala parameter in the groundwater represents 10 acres.  5. If used for irrigation, give the acreage and dese to which water has been applied and name of the which water has been applied and name of the construction of use, if possible. Each mail square represents 10 acres.  6. The means of withdrawing such water from the groundwater laws of groundwater and completion of the construction of the well, wells, or other drawal of groundwater laws at 1975 and 2075.  8. The depth of water table Latractal at 4 ff. water Calama.  9. So far as it may be available, the type, size and depth of each well or the general specific works for the withdrawal of groundwater can be supposed to the well or the general specific works for the withdrawal of groundwater can be supposed to the well or the general specific works for the withdrawal of groundwater can be supposed to the well or the general specific works for the withdrawal of groundwater can be supposed to the construction of the well or the general specific works for the withdrawal of groundwater can be supposed to the construction of the well or the general specific works for the withdrawal of groundwater can be supposed to the can be sup	rcey
